

Pranav Kulkarni

Fullstack Developer

Hey there, I'm Pranav, a seasoned full stack developer proficient in Spring Boot for backend, MySQL for DBMS, and Angular for frontend. Skilled in creating REST APIs, implementing DSA, design patterns, and software architecture. Well-versed in Git version control and adept at AI/ML using Prolog and Jupyter Notebook. My approach to programming and life in general is "process over result". I believe communication is key and my openness to learn new technologies gives me a bird's eye view.

- Communication Skills, leadership skills, Teamwork

Frontend Developer GetLitWithFin (York University)

09/2022 - 04/2023

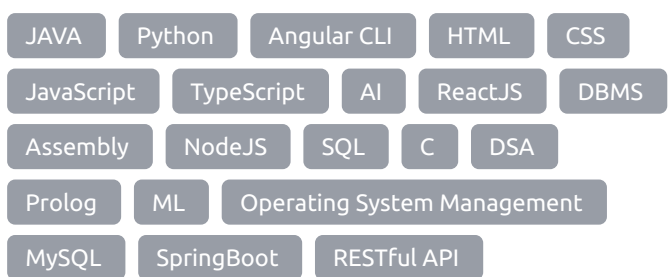

Toronto, Canada

On a Capstone project, York University and I had worked together. The project's challenge was to fairly impart financial knowledge to the K-12 Sector. I and my colleagues came up with a workable solution to this issue, and I was assigned the task of creating a website as the front end developer to show off the outcome.

Achievements/Tasks

- Frontend Development
